

## ***Air-Blown Solution for Microduct Cables (FTX)***

Teldor is a dynamic, top-quality manufacturer of industry leading OSP cables.

Our intimate knowledge of the US OSP market and its cable requirements have made our products the cables of choice installed in many of the large OSP projects in the US over the last decade. Teldor Microduct Cables are especially designed for blowing in microducts in order to save space and cost while reducing installation time. **Our technology enables us to produce extremely high fiber counts (up to 864 fibers with a reduced outer diameter of less than 0.63").**

- Teldor uses optical fibers only from well-known US fiber manufacturers meeting the most rigid of standards
- Teldor stocks large quantities of Fiber Optic OSP cables throughout North America, with an exceptionally wide range of cables
- Teldor cables are produced in our facilities in ISRAEL, are covered in the "Buy America Act" and are approved by RUS
